

Bots

Question: What are bots? What are the bots used for?

Answer: Bots are your automation profiles (e.g., Instagram, TikTok, or other accounts). They perform scraping, posting, and interactions.

Question: How to view/see bots? Where can we find bots?

Answer: To view bots, you need to follow the steps given below:

- On the **Dashboard** sidebar, click **Resource Creation** tab.
- From the toggle list, click **Bots**.
- The **Available Bots Table** will display details like:
 - Profile Name, Username, Email, Bio, Phone
 - Linked Device, Server, Proxy
 - Status (Created On, Logged In, Scraper Status)
 - Activity Stats (Scraped So Far, API Success/Failures)

Question: How to add/create bots? How can I add/create a bot? I want to add/create a bot.

Answer: To add/create bots, you can follow the steps given below:

- On the **Dashboard** sidebar, click **Resource Creation** tab.
- From the toggle list, click **Bots**.
- Click **Add Bots**.
- In the popup:
 - Click **Download Template** → Fill in your bot details.
 - Example entry:
 - Name: John IG Bot
 - Username: john_doe01
 - Email: johndoe@gmail.com
 - Phone: [+1234567890](tel:+1234567890)
 - Device: USA_Emulator_01
 - Server: VPS_NewYork_01
 - Proxy: proxy1.webshare.io
 - Copy the **Google Sheet URL** and paste it into the field.
- Click **Submit**.

Best Practice: Always test bots in small batches before uploading 100+ at once.
